

The Premier

Petroleum Economics & Reserves Software

“MOSAIC has increased our efficiency and allowed us to focus our time on more important business issues.”

Dave Mombourquette

VP Business Development, Whitecap Resources, Inc.

The Premier Petroleum Economics & Reserves Software

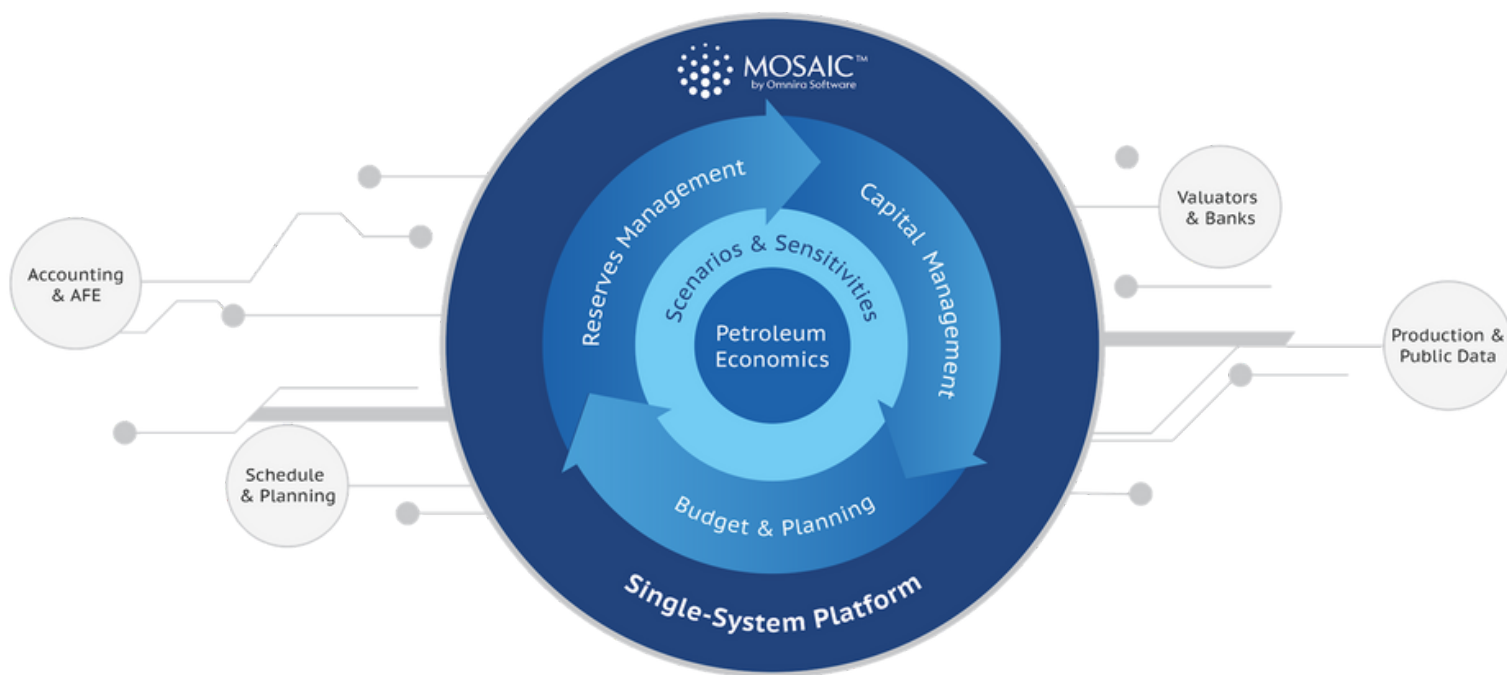

MOSAIC™ delivers insight with a complete reserves management, petroleum economics, budgeting, capital planning, and decline analysis. More than 100 upstream companies rely on MOSAIC, the only integrated reserves and economics software proven to outperform legacy systems in operational efficiency, risk reduction, and time to value.

Leave Legacy Software Behind

Improve reserves processing time from five weeks down to five days on average.

1/3 Less time spent on data entry and manipulation.

Lower overhead in G&A costs for IS/IT support by 40x compared to legacy systems.

The Premier Petroleum Economics & Reserves Software

Upstream oil and gas companies work hard to maximize cash flow and create value, looking for ways to streamline processes, reduce expenses, and optimize results.

Whether you are managing reserves, guiding an asset team, or involved in the budget process, pulling together the “big picture” is challenging. Disparate systems, models, and assumptions make it difficult to align departments and communicate corporate performance targets.

With MOSAIC, energy companies eliminate inefficient and error-prone data transfers between systems. It's the industry's most complete application for reserves management, petroleum economics, budget and planning, and capital management

Reserves Management

Deliver immediate economic results to stakeholders with reserves management that is accurate, secure, and auditable.

Petroleum Economics

Rely on the fastest, most complete economic engine for the best decisions, at the right time, with the most accurate data.

Budget & Planning

Create confidence in budget, planning, and forecasting across teams to drive greater insight throughout your business.

Capital Management

Focus on critical decisions that support your business strategy through efficient tracking, review, and reforecasting of capital.

Mosaic Software delivers the most efficient and reliable reserves management engine in the oil and gas industry. For additional information, please visit mosaicprms.com.
